

Posters for Thesis and Individual Project Students

Semester 2, 2023

The presentation component for this course is to be produced in the form of a poster. This poster will be displayed at the Computing Showcase in the first week after the end of semester, where you are welcome to accompany the poster and explain it to interested passers-by.

Your poster should

- be formatted so that it prints well on a piece of A0 or A1 paper;
- be visually appealing (it should attract the attention of people who walk past it);
- explain the nature of your work;
- describe your results; and
- be comprehensible for an interested but non-expert audience.

You will be assessed entirely on the poster itself, so you do not need to be present at the Showcase to explain it to me. On the other hand, if you want to be there, please do come! (You should have registered using the EventBrite link shared on Wattle earlier.)

The poster mark is 10% of your final grade.

There are now Turnitin submission links on your Wattle pages; you need to submit a PDF file.

The deadline is 16:30 on 20 October 2023.
